

14<sup>th</sup> April, 2025

To whom it may concern,

It is my pleasure to write this letter of recommendation for Mr. Askar Fayzullin, a Year 1 student pursuing a BSc (Hons) in Business Computing and Data Analytics at Hong Kong Baptist University. I had the privilege of teaching him in the course of ChatGPT – the start of Generative AI and Mathematical Methods of Business Computing during his first year, and I have been consistently impressed by his academic performance, analytical skills, and proactive attitude.

Askar is a goal-oriented and determined individual who sets high standards for himself and consistently achieves them. His disciplined approach to his studies is complemented by his unique multicultural background, which allows him to work effectively in diverse teams and bring a global perspective to his projects.

He is a lifelong learner with a persistent and resilient mindset, always eager to expand his knowledge and skills. Askar has shown a particular interest in the latest technology, often exploring new advancements in AI and data analytics beyond the classroom requirements. This curiosity and enthusiasm for cutting-edge technology make him stand out among his peers.

Given his remarkable qualities and dedication, I wholeheartedly recommend Askar for the Hong Kong Laureate Forum 2025. I am confident that he will contribute positively to the forum and further develop his skills and knowledge through this prestigious opportunity.

Sincerely,

*Wilson Yu*
