Letter of recommendation for Bharathi Suriya

To Whom it May Concern,

I am pleased to write this letter in support of Bharathi's application for [specific program or position, which I will fill out according to what I apply for]. Bharathi worked in my lab at the school of Biomedical sciences, University of Hong Kong two months, consistently demonstrating exceptional skills and dedication.

During her time in the lab, Bharathi took on various responsibilities, including literature review, conducting experiments such as PCR, gel electrophoresis, primer construction, and analysing data. She can clearly understand complex concepts and apply them to her experiments. For example, in a recent project focused on constructing a riboswitch, Bharathi not only designed and conducted experiments but also played a key role in interpreting the results, highlighting her analytical skills.

Bharathi is not only a diligent researcher but also a collaborative team member. She actively engages with her peers, offering insights and support that enhance the overall productivity of our team. Her enthusiasm for scientific inquiry is infectious, creating a positive and motivating environment in the lab. She has organized several group discussions that have sparked new ideas and fostered a sense of community among lab members.

While working in the lab, Bharathi demonstrated strong adaptability and effective time management skills. She adjusted smoothly to new protocols and challenges, which helped the team navigate various situations smoothly. Additionally, she managed her time well, prioritizing tasks to meet deadlines while ensuring that the quality of her work remained high. These skills contributed to a productive and efficient lab environment.

I wholeheartedly recommend Bharathi for research assistant position in your lab. Her intelligence, work ethic, and collaborative spirit make her an outstanding candidate who will undoubtedly be an asset to your program. If you have any questions or need more information, please feel free to contact me.

Yours Sincerely,

Andrew Kinghorn
