14 April, 2025

Dear Members of the Selection Committee,

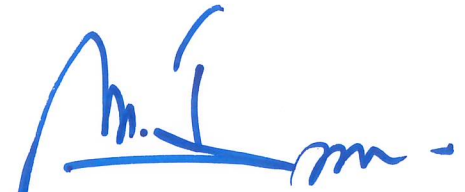

I am delighted to write this letter in support of Dr. Nurbek Kakharman's application for the Hong Kong Laureate Forum. I have had the privilege of knowing Dr. Kakharman since 2020 through collaborative work on a project led by Professor Kalmenov T.Sh, a renowned mathematician and my esteemed colleague. During this period, I have been consistently impressed by Dr. Kakharman's intellectual curiosity, technical expertise, and dedication to advancing mathematical research.

Dr. Kakharman is a talented mathematician with a deep understanding of partial differential equations and related analytical topics. His research stands out for its precision, originality, and clarity of purpose. I have followed his academic progress with great interest and admiration, and I have no doubt that he will continue to grow into an influential figure in the mathematical sciences.

Beyond his academic strengths, Dr. Kakharman is also a generous collaborator and an excellent communicator, qualities that make him a valuable participant in any international academic setting. He has a sincere passion for research, and I am confident he would benefit immensely from the interactions and exchange of ideas at the Hong Kong Laureate Forum.

I give my strongest support to Dr. Kakharman's application and believe that he will contribute positively and meaningfully to this important event.

Sincerely,

Prof. Dr. Mansur I. Ismailov  
Professor of Mathematics
