## Recommendation letter for Karlygash Dosmagulova

I am delighted to write this letter of recommendation for Karlygash Dosmagulova, who has been both a PhD graduate student and an esteemed colleague at Al-Farabi Kazakh National University where she currently serves as the Deputy Head of Department of Mathematics for Scientific-innovation work and international relations.

Dosmagulova has consistently demonstrated exceptional leadership, scholarly contributions, and a deep commitment to advancing the field of mathematics. As a collaborator on several scientific papers, I have had the privilege of witnessing her outstanding intellect, creativity, and dedication to rigorous academic inquiry.

In addition to Karlygash's role as a teacher, she has proven to be an instrumental force in the administration of her department. In her capacity as Deputy Head, she has effectively overseen various aspects of departmental affairs, including curriculum development, faculty mentoring, and the establishment of international collaborations. Her leadership style is characterized by a judicious blend of strategic vision, collaborative decision-making, and a strong commitment to fostering a supportive and dynamic academic environment.

Karlygash has also been actively involved in enhancing the international profile of her department. She has successfully initiated and nurtured partnerships with renowned institutions as URCA in France and UGhent in Belgium, fostering academic exchange programs, collaborative research projects, and international conferences. Her efforts have significantly contributed to positioning as a hub for academic excellence and global collaboration.

Furthermore, Karlygash is a respected mentor and advisor, providing guidance to both junior and senior faculty members. Her dedication to the professional development of colleagues and her ability to foster a collaborative and inclusive academic community have made her an invaluable asset.

In conclusion, I strongly recommend Karlygash Dosmagulova for academic and professional opportunities that align with her expertise and leadership skills. She possesses a rare combination of scholarly excellence, administrative acumen, and a deep commitment to advancing the international standing of our academic community.

If you have any further questions or require additional information, please feel free to contact me.

Sincerely,  
Dean of the Faculty of Mechanics and Mathematics, PhD  
N.Doszhan
