To the Hong Kong Laureate Forum Committee,

It is my great pleasure to recommend Yang Xicheng for the Hong Kong Laureate Forum 2025. As his co-supervisor at the Center for Biomedical Informatics and Genomics, Xi'an Jiaotong University, I have had the privilege of working closely with Yang Xicheng on several research projects, and I can confidently say that he is one of the most talented and dedicated young scientists I have encountered.

Xicheng has demonstrated exceptional academic ability and research potential in the field of biomedical informatics. He has been actively involved in the development of machine learning algorithms analysis based on single cell data and multi-omics biomedical data. His ability to integrate computational methods with biological insights is truly remarkable.

In addition to his academic achievements, Yang possesses outstanding personal qualities. He is a collaborative team member who consistently contributes innovative ideas and supports his peers. His leadership skills were evident when he was the monitor of my class during his undergraduate period.

I believe that Yang Xicheng would greatly benefit from the Hong Kong Laureate Forum. His passion for interdisciplinary research and ability to engage with leading scientists make him an ideal candidate for this prestigious event. I am confident that he will make significant contributions to the forum and gain valuable insights to further his research career.

Please feel free to contact me if you require any additional information.

Sincerely,

Guo Yan,
