

**Department of Oncology-Pathology**  
Theodoros Foukakis, Professor

Dear Hong Kong Laureate Forum,

I would like with this letter to express my full support to Dr. Kang Wang's application to the 2025 Hong Kong Laureate Forum in Hong Kong.

I am a professor and senior oncology consultant at the Department of Oncology-Pathology, Karolinska Institute. My research focuses on translational studies of breast cancer, aiming at identifying molecular biomarkers of response to therapy and better understanding the mechanisms of action of novel oncology drugs.

Kang is one of the excellent PhD students in my group. He has a background in clinical medicine but has worked with bioinformatics in the past few years. Despite his young age, Kang has impressive publication records and advanced skills in data analysis. He joined my group as a PhD student three years ago and has since then attended advanced courses in bioinformatics and worked together with senior members of the group in a translational breast cancer multi-omics project, especially focusing on cancer immunogenomics. I am confident that the interdisciplinary meeting with peers will greatly enhance his knowledge, his contribution to our current project and his future career.

To conclude, I regard Kang as one of the brightest doctoral students and I am very glad to recommend him for the application of this Hong Kong Laureate Forum in Hong Kong. I strongly believe that Kang has the necessary skills, motivation, and dedication to excel in the meeting. I am confident that he will make a valuable contribution to the program.

Please do not hesitate to contact me if you require further information.

Yours Faithfully,

Theodoros Foukakis  
Professor, Senior Consultant  
Department of Oncology-Pathology, Karolinska Institutet  
Breast Center, Karolinska University Hospital
