To Whom It May Concern,

I am pleased to write this letter of recommendation in support of Xu Jie, a student at the Faculty of Information Technology, Monash University, for her application to participate in the Hong Kong Laureate Forum 2025. I have had the privilege of supervising Jie's research on lattice-based cryptography for approximately a year.

Jie is an outstanding student with remarkable creativity, analytical rigor, and passion for mathematical sciences. She possesses a strong foundation in mathematics and cryptography and has mastered advanced techniques essential for cutting-edge research in the field. Her ability to tackle complex problems with precision and originality is truly commendable. Additionally, Jie demonstrates excellent communication and collaboration skills—she has effectively presented her research at conferences and workshops and has successfully engaged with researchers both within our group and internationally.

Jie's research interests and accomplishments align closely with the Hong Kong Laureate Forum's mission of fostering intellectual exchange and scientific advancement. This prestigious platform would provide her with a unique opportunity to engage with world-renowned scholars, gain invaluable insights, and expand her professional network. I am confident that Jie will not only benefit greatly from this experience but will also contribute meaningfully by sharing her enthusiasm, curiosity, and innovative ideas with peers and mentors.

Thus, I strongly recommend Xu Jie for the Hong Kong Laureate Forum 2025, and I hope her application will receive your highest consideration. Please feel free to contact me should you require any further information.

Sincerely,

March 24, 2025
