

Dear Admissions Committee,

I am pleased to recommend Nurdaulet Tobakhanov for participation in the 2nd Hong Kong Laureate Forum. As a third-year PhD student in the Department of Mathematics at Nazarbayev University, Nurdaulet has demonstrated exceptional dedication to research and academic excellence.

Over the past year, I have had the opportunity to listen the talk of Nurdaulet on studying the qualitative properties of solutions to the biharmonic heat equation on exterior domains. His strong analytical skills, ability to grasp complex mathematical concepts, and commitment to solving challenging problems make him a promising young researcher.

Beyond his technical abilities, Nurdaulet exhibits outstanding leadership, discipline, and curiosity. He approaches research with enthusiasm and perseverance, consistently seeking innovative solutions and engaging in productive discussions. His ability to clearly present ideas and collaborate effectively further underscores his potential for success in academia.

I strongly support his application to the Hong Kong Laureate Forum, as I believe this experience will provide him with a valuable opportunity to interact with leading scientists in mathematics and computer science. It will undoubtedly contribute to his growth as a researcher and help him advance in his academic career.

I highly recommend Nurdaulet for this opportunity and wish him every success.

Yours sincerely,

Meirkhan Borikhanov

Khoja Akhmet Yassawi International Kazakh-Turkish University
