1 March 2025

Selection Committee, Hong Kong Laureate Forum 2025

Nomination for Hong Kong Laureate Forum 2025

Dear Selection Committee Members,

I am writing to support Mostafa Elsaady (Assistant lecturer, Faculty of Science, Ain-Shams university. And a Ph.D. student, department of chemistry, National university of Singapore) to attend the Hong Kong Laureate Forum 2025.

In 2016 I had the opportunity to teach an undergraduate course to Mostafa Elsaady and postgraduate study (premaster). He graduated with first-class honors and was the first on the list. He was then appointed as a demonstrator in chemistry department. Also, I supervised his M.Sc. thesis. Mostafa currently occupies the position of assistant lecturer at our Department of Chemistry. And is now on a study leave to pursue his Ph. D. in Chemistry department, National university of Singapore under the Singapore International Graduate Award (SINGA).

Mostafa was very active young scientist during his master's degree, he participated in a number of research projects in the area of optical biosensor and successfully published several research papers in highly impacted journals, including Journal of Material Chemistry C, Talanta, ACS Omega, Applied Organometallics, and Frontiers in Chemistry. Additionally, Mostafa co-authored a chapter in a book published by the Royal Society of Chemistry (RSC). Currently, his research is focusing on single atoms nanozymes and their remarkable applications in environmental remediation.

Mostafa is a promising young scientist with high scientific curiosity and ambition. He is one of the best students whom I have supervised. He is honest, independent, and incredibly hard-working. Beyond that, he has a well-behaved and admirable, and helpful personality that enables him to gain the love and the respect of his professors and the students.

I believe Mostafa Elsaady is the most suitable candidate to attend the Hong Kong Laureate Forum 2025. I strongly recommended him. If you have any further questions regarding Mostafa, please do not hesitate to contact me using the information in this letter.

Best Regards,

Professor Dr. M. S. A. Abdel-Mottaleb

*Dr. M. Sabry A. Abdel-Mottaleb, Professor of Chemistry (Emeritus), Dr.rer.nat (Friedrich-Schiller Uni. Jena), Fellow of DAAD and Heinrich-Heine Stiftung (Max-Planck Institut fuer Strahlenchemie), Fellow of British Council, Belgium Nat. Sc. Foundation, ICS-Trieste, Founder of the International Journal of Photoenergy (IJP Hindawi Ltd.). Principal Investigator, NanoPhotochemistry, Solar Chemistry, and Computational Chemistry Labs, Department of Chemistry, Faculty of Science, Ain Shams University, 11566 Abbassia, Cairo, Egypt Tel: + 20122 216 9584 +44 7766712789*
