Dear Hong Kong Laureate Forum Organizing Committee,

I am writing to enthusiastically recommend Dr. Jingjing LIU to join the Hong Kong Laureate Forum 2025. As her doctoral supervisor at Shanghai Jiao Tong University and her postdoctoral supervisor at Hong Kong Baptist University, I have known Dr. LIU for seven years. During her doctoral studies, she focused on the development of functional metabolomics strategies and the application of functional metabolomics to identify therapeutic targets for pancreatic cancer. She has demonstrated exceptional expertise and dedication in the field of biomedical science.

Throughout her doctoral training, Dr. LIU's professional and research skills continually improved. She successfully completed two independent projects centered on functional metabolomics strategies and pancreatic cancer. Her impressive work has resulted in the publication of over ten SCI papers in relevant fields, underscoring both her academic rigor and her in-depth knowledge. Furthermore, Dr. LIU has actively participated in numerous academic conferences, clearly demonstrating her passion for scientific research, familiarity with her specialized field, and exceptional research capabilities. Finally, her dissertation, entitled "Functional Metabolomics Strategy Facilitated the Discovery and Functional Characterization of Potential Therapeutic Targets of Pancreatic Cancer," was a testament to her rigorous research and original thinking, earning high praise from her examination committee and peers.

In addition to her academic achievements, Dr. LIU is known for her integrity and collegiality. She actively participated in multiple projects to help other members of her research group, demonstrating her dedication to the academic community and ability to work collaboratively.

Therefore, it is evident that Dr. Liu has extensive experience and a solid research foundation in applying functional metabolomics to discover novel drug targets for pancreatic cancer. Her innovative research and collaborative spirit make her an ideal candidate for join the forum. In conclusion, I am confident that Dr. Jingjing LIU will

make substantial contributions to the laureate forum. Her background, skills, and dedication make her exceptionally well suited to this opportunity. I wholeheartedly support her application and believe she will continue to excel and innovate in the field of biomedical science.

Yours sincerely,
