

Re: Reference for Jamie Cheung

June 21, 2024

To Whom It May Concern:

I am writing to provide a professional reference for Jamie Cheung. I have known her since 2017. Jamie was working towards her MPhil degree while I was completing my PhD degree at the Department of Pharmacology and Pharmacy at the University of Hong Kong. We were both under the same co-supervisor, Professor Aimin Xu. After completing my PhD degree, I worked as a Post-doc Fellow, and I am currently the Research Assistant Professor at the same department.

Jamie is always very punctual, professional, and eager to learn. In 2017, she graduated with a bachelor's degree in pharmacy from the University of Alberta. Then, she passed the national pharmacist exam in Canada and received the clinical pharmacist practice license in the same year. The national pharmacist qualifying exam consists of two parts: a written part and an objective structured clinical exam (OSCE).

After that, she pursued her research master's degree in pharmacology at the University of Hong Kong (HKU). During her time at HKU, she passed all three licensing exams for overseas graduates on the first attempt. To fulfill her pre-registration pharmacy internship requirement in Hong Kong, Jamie received training at the pharmacy department at the Hong Kong Sanatorium and Hospital.

Later, she was awarded the Hong Kong PhD Fellowship for her work at the medicine and therapeutics department at the Chinese University of Hong Kong. Her research focused on detecting non-alcoholic fatty liver disease and assessing skin autofluorescence scores in patients with type 2 diabetes.

Jamie is very pleasant and polite, and she can communicate effectively with healthcare professionals. She has a strong drive to exceed expectations and would be a great asset to any team. I wish her luck in all of her future endeavors.

Sincerely,

WU XIAOPING

Dr. Amber Xiaoping WU  
Research Assistant Professor  
Department of Pharmacology and Pharmacy, HKU.
