CDTS Seedcorn call - October 2023.docx; YZ Yuanyuan_Zhang_CDTS Funding Application 2023.pdf;

Dear Yuanyuan and the team,

Thank you for applying to the Centre for Digital Trust and Society's seed corn funding competition for 2023/24. We are delighted to let you know that after a careful consideration the team have agreed to fund your project which fits within our research clusters:

- **Trusted Digital Systems**, led by Prof. Mustafa Mustafa
- **Workplace and Organisational Security**, led by Prof. Nadia Papamichail
- **Democracy and Trust**, led by Prof. Peter Knight
- **Advanced Mathematics**, led by Dr Ines Henriques-Cadby

Please liaise with the cluster leads to make sure that your projects are connected.

Your application and the funding call are attached for reference. You will be assigned 75% of your requested funds to start with, and this will be reviewed following an **interim report** which you will need to provide in April. Please note that you are also required to complete a **blog post** and **short final project** report upon completion of your project which must be by 31 July 2024 - see the [Seed corn projects 2022 - 2023](#) webpage for previous years' examples. We would also like to encourage you to present your research findings at one of our [Digital Trust and Security seminars](#) – contact Kitty.Lo@manchester.ac.uk for more details about these.

The SoSS Research Operations team will be in touch to confirm the P code for your project, deadlines for the reports, and to provide relevant templates. If you have any questions or foresee any cash flow problems with the 75% starting point, please contact soSS-research-operations@manchester.ac.uk.

Congratulations on a very interesting and promising proposal – we are looking forward to seeing it develop!

Best wishes, on behalf of the Centre team,
Lou
