

Dear Admissions Committee,

I am pleased to recommend Nurdaulet Tobakhanov for participation in the 2nd Hong Kong Laureate Forum. He is currently a third-year PhD student in the Department of Mathematics at Nazarbayev University.

I have known Nurdaulet for a year in my capacity as a researcher, and we have been working together on studying the qualitative properties of solutions to the biharmonic heat equation on exterior domains. Additionally, he is exploring results for the Sobolev-type equation on exterior domains, which represents a new direction in his research.

Nurdaulet is a talented and ambitious young researcher, demonstrating a deep understanding of mathematical concepts and exceptional leadership. He is disciplined, hardworking, and inquisitive, always striving to expand his knowledge. One of his greatest strengths is his ability to quickly grasp complex scientific ideas and effectively present innovative solutions.

In conclusion, I strongly believe that he deserves a place at the Hong Kong Laureate Forum. This opportunity will allow him to engage with leading scientists in mathematics and computer science, further enhancing his development as a young researcher.

I wholeheartedly support his application and wish him the best of luck.

Yours sincerely,

Professor Dr Berikbol T. Torebek
Main Researcher
Ghent Analysis & PDE Centre
Department of Mathematics: Analysis, Logic and Discrete Mathematics
Ghent University
Krijgslaan 281, Building S8, B 9000 Ghent, Belgium
