Reference Letter for Mr. MD Ishtiyak Jafar

It is with great pleasure that I write a letter of recommendation behalf of **Mr. MD Ishtiyak Jafar** whom I know for almost two years. He was attentive, prepared, submitted well-written and thoughtful assignments, and participated in meaningful ways, such as by debating other students. When placed in group work sessions, still being an **International student**, Mr. Jafar easily adopted a leadership role, helping his peers learn how to solve problems on their own. I certainly should mention that his English proficiency is good enough to work in international institutions and he is very humble and soft spoken.

During his final year research, Mr. Jafar demonstrated the ability to work independently with great creativity and enthusiasm. He also put in many long hours. He worked as hard as my best graduate student. He has just the right combination of assertiveness and respect to make him a joy to work with in the lab. This is a student that I will enjoy watching develop into a highly productive research scientist. Furthermore, his persuasiveness and mature personality shows that he can be a good researcher and teaching scholar in the days to come. I strongly recommend him to any national or international institution for PhD to pursue a Research career.

In closing, I believe that Mr. Jafar has the capacity to excel in a career as a researcher. He is one of a small handful of students that I have encountered in my several years teaching undergraduates that has this ability. Seeing his serious yearning for further education, persistence and striving for purpose, I think that he will realize his huge potential and inevitably obtain excellent results in his future scientific career. Should you need further information, please do not hesitate to contact me.

Sincerely,

Dr. Pawan Arun Kulkarni

Associate Professor
Deptt. of Biochemistry
Rama Medical College
Mandhana, Kanpur
